

How Many Wrappers

All wrappers that are required to transport the load must be put on the load within sight of the loading area. 437-007-1010(4)

Loads must be secured as follows:

(a) Any long logs (27 feet or more in length) must be secured with not less than four evenly spaced wrappers.

EXCEPTION: Loads consisting of only four long logs or less may be secured with one wrapper at or near each bunk.

(b) All short logs (less than 27 feet in length) must be secured with at least two evenly spaced wrappers.

437-007-1010(7)

All required wrappers must be kept tight during transit.
